MANY  
VARIETIES!

## TESTIMONIALS

"NGP supplied us this summer with all of our outdoor furniture for our nursing home following our recent extension. Our residents, their visitors and our staff find it very comfortable, it looks great and will be very long lasting.

I would have no hesitation in recommending NGP for their excellent products and service."

***~ Araglen Nursing Home***

"Wilkestown community centre have recently invested in our outdoor Amenity Park. Our new picnic benches and seats from NGP are fantastic, and a major asset to our community. The colour also ties in perfectly with the surroundings, everything matches and coincides, from our picnic benches and seats to our outdoor noticeboard and bin.

The main attraction to us was little to no maintenance and durability. The fact they are made of 100% plastic fits perfectly with our sustainability commitment"

***~Tara Smith, Wilkestown Community Centre***

## ABOUT US

We are a family run business based in Co Meath. We take old, used plastics and manufacture recycled plastic profiles from which we make our products.

Our products are an alternative or replacement for wood/timber products. NGP are concerned about the next generation and we hope by choosing our sustainable, environmentally friendly products instead of wood/timber that people contribute to reducing their carbon footprint also. We are thinking about the next generation and we want other people to think about that too.
